

Notice of changes to the Source Protection Plan

The Source Protection Plan for the Raisin Region Source Protection Area and the South Nation Source Protection Area was edited and re-published on September 1, 2016. The most current version is version 1.4.0.

The changes were in accordance with Section 51 of O.Reg. 287/07 (i.e. amendments that are clerical, grammatical or typographic).

Additionally, references to the Embrun-Marionville groundwater system were removed as that drinking water system has been decommissioned and removed from the Assessment Report for the South Nation Source Protection Area.
